

**OUTDOOR CLASSROOM
WOODWARD PARK**

Grab your water bottle, wear old clothes, sneakers that can get dirty, and come explore our 45-acre **Tulsa Park this Summer** with our Naturalist Trail guides! This **Tulsa Garden Center** program will host **four to five fun-filled hours** of trail activities for Elementary and Middle School Students via Community Partners. **All campers will participate under 100% scholarship from the Tulsa Garden Center.**

RESERVE YOUR PROGRAM'S ADVENTURE TODAY:

Visit OCWPstem.org

Trip Details and Checklist: This single-day, experiential adventure into our living laboratory at Woodward Park will explore STEM (Science, Technology, Engineering and Math...fun Math), awaken artistic creativity and imagination, get a little messy with nature, and instill an Entrepreneurial mindset in our young innovators and change-makers.

This field-day for camper groups & schools can start as early as 8:30AM and end as late as 4PM weekdays during the Summer. **Please check our website for family Saturdays at the Park!** Group sizes range from 15-50 campers, with six chaperons per day. Multiple days can be scheduled across the summer, or for larger groups. Camper ages 6-13, with Junior Naturalist opportunities available for older students. Each field day will consist of three Trail Activities selected from the list below. Reservations are on a first come, first served basis, should include timings, three activities, and are subject to confirmation by Outdoor Classroom.

Our Naturalist Educator guides serve as facilitators for the trail programs. The school is responsible for child welfare, lunches, and snacks.

Transportation scholarships are also available upon request.

Reserve your team's adventure ONLINE today! Send all inquiries to the Program Director -

brian.b@tulsagardencentre.org

The Program runs from June 7th – August 6th, based on available days at the website.

Adventure Trails: Program Activities

(Pick **2 or 3** – Include on Online Booking, Descriptions on Next Page)

- Design Lab** – Aquaponics & 3D Prototyping
- Incredible Journey** – Be a Water Molecule
- Survival Engineering** – Forts & Shelters
- Radical Mycology** – Experience Mycelia
- Orienteering** – Never get Lost Again
- Scavenger Hunt & Nature Hike** in the Park
- Our Secret Garden** – The World of Linnaeus

- Time Travelers** – Artfully Recreate Tulsa History
- Enviroscape** – Be Mayor of Realville for the Day!
- Predators to Prey** – Where the Wild Things Roam
- Terraforming** – Building the spheres of life!
- HAVE FUN AT THE PARK**

Program Trails at Outdoor Classroom

Curate your campers' experience by selecting three from the list and booking your day online.

Design Lab – Aquaponics: Wondering what is on the menu on the Moon or Mars? Explore engineering an aquatic and terrestrial ecosystem to feed our growing world, and beyond. Follow **Design Thinking** and become a STEM Entrepreneur and work with 3D printed prototypes. *Design the change you want to see in the world.*

Incredible Journey: Become a water molecule and travel the Earth's hydrosphere. Chill in a glacier, ride the waves of the oceans, or find your favorite fishing hole. Build a bracelet that tells the story of your own incredible journey.

Survival Engineering: Imagine yourself dropped into the mountains, the desert, the rain forest, or good old windy Oklahoma. What does it take to survive? With only limited and improvised supplies, what will your home look like?

Radical Mycology: The end of the food chain is actually the beginning of an exciting world of fungi and the largest living organism in the world! It is also how nature communicates and restores our planet. That favorite mushroom on your pizza will take on a whole new meaning. Explore Woodward Park and what lives below every footstep.

Orienteering: Are you wondering how that Amazon drone will deliver your new PS6 to your doorstep someday? Be an explorer on a scavenger hunt of our Arboretum, using only a compass to guide your journey. The skills you gain will determine that drone's success in finding your doorstep.

Scavenger Hunt & Nature Hike: There are a LOT of interesting and often hidden landmarks to explore in the 45-acres of this 100-year-old Tulsa Park. Adventure to an English herb garden, discover the grotto, feed the Koi, traverse the trails, and act out a little Shakespeare, "To be or not to be, that is the question." You want to be...here!

Our Secret Garden: Let's get our hands dirty and create something beautiful! Our Master Gardener will reveal the diversity of our Linnaeus Teaching Garden to junior green thumbs as they learn the joys bringing things abloom from seeds to cloning! Stop and smell the flowers.

Time Travelers: Pull out your sketchbook, wander the pathways of the neighboring **Tulsa Historical Society Museum**, and recreate Tulsa's architectural past from the remnants left behind. Let your imagination rebuild a bit of history.

Enviroscape: Be Mayor of your Town! See how daily activities of your citizens might impact the neighborhood. Discover how the little things add up! Everything eventually does flow downstream. We will then explore the Park to see how nature cleans up its act, to protect the fishies and the squirrels.

Predators and Prey: We have a lot of wildlife at Woodward Park. Take on the role of your favorite animal or plant to build the web of life. Learn about your role as a great steward of the natural world in the Park and at home.

Terraforming: Want to live on another planet someday? Let's figure how this planet supports life and generates our ever-changing Oklahoma weather! We will start with building a cloud in a bottle, then look up to the sky and down at our weather app for more answers. We are going to science the heck out of this!
